

Surrogate

Your surrogate is your faithful companion from the old world, namely a mech of the type you select at the very start of the game. It offers moderate values in terms of attack strength, defense strength and hitpoints, and will support you effectively in your initial misdeeds. It is urgently necessary to develop even more powerful mechs, as this model will eventually hit the limits of its ability as the game progresses.

Base values

130 ATK / 360 DEF / 325 HP

Costs

already covered at the start of the game
